# Nestor OptoBox 4

Features

- Nestor OptoBox 4 is a fibre optic termination box for indoor installations
- Designed for non-metallic optical cables
- Suitable for indoor-, micro- and nano cables as well as microducts up to OD Ø7 mm
- Delivered as a basic assembly or as a pre-installed pigtail kit including pre-installed adapters and pigtails according to customer specifications
- Also available as pre-assembled pigtail cable kit with 0-100 m connectorized indoor cable with tested connectors pre-installed to adapter
- Simple design, easy and fast to install
- Secured on a wall from the outside, so there is no need to remove the cover
- Size: 105 x 105 x 22 mm (W x H x D)
- Material: White ABS plastic
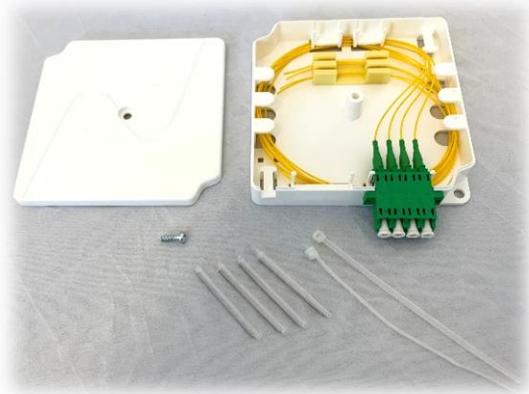

Basic assembly

- Frame, cover and screw for sealing the cover
- Holder for four splice protection sleeves
- Two cable ties for incoming cable
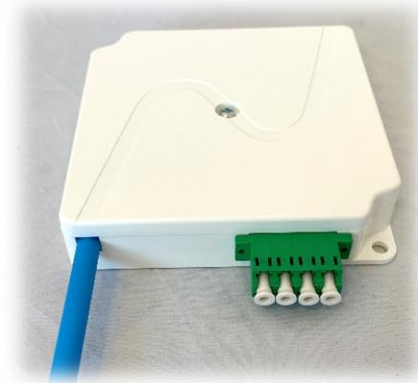

Pigtail kit content

- Frame, cover and screw for sealing the cover
- Holder for four splice protection sleeves
- Two cable ties for incoming cable
- One, two or four pigtails (SC/UPC, SC/APC, LC/UPC, LC/APC) according to customer specifications
