

Splice Cabinet Combination K0 + NC-320 Optimus

Introduction

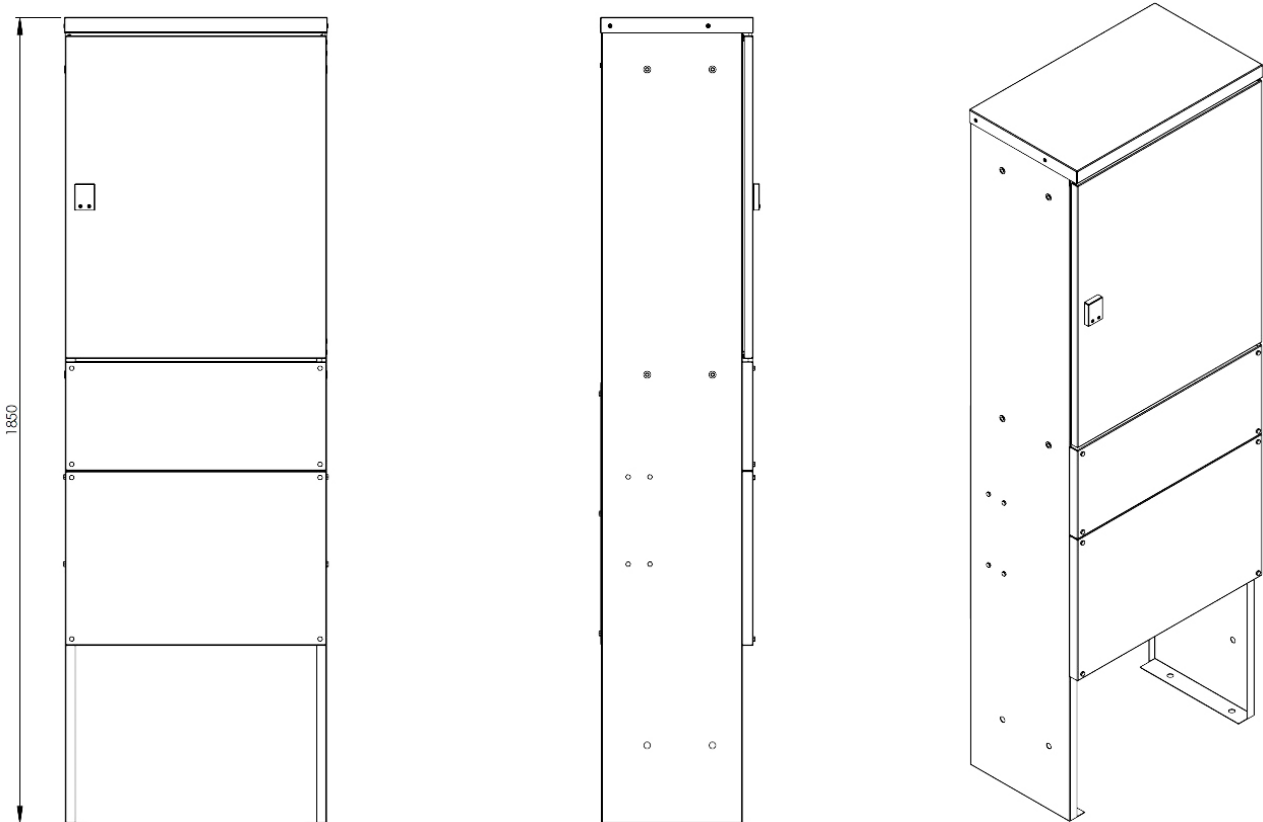

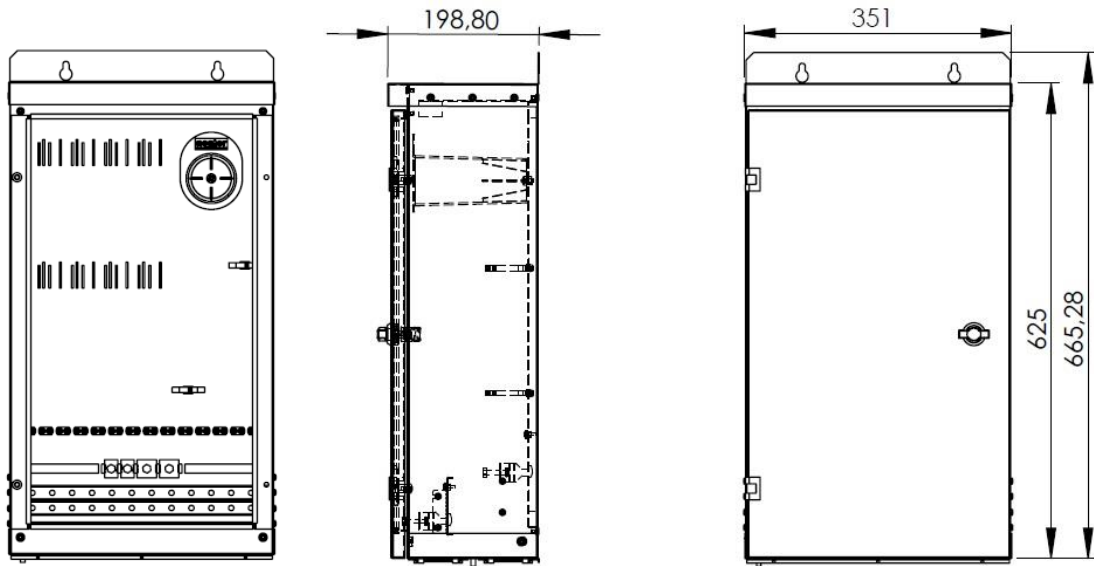

Splice cabinet combination K0 + NC-320 Optimus consists of a street distribution cabinet with an unheated splice cabinet mounted inside. The cabinet combination is used for splicing and terminating micro-cables inside the microduct network.

Features

- Cabinet combination for outdoor use, which includes an outdoor cabinet with stand and a splice cabinet for optical fibres.
- The product has been designed especially for FTTH applications in microduct networks.
- Basic assembly
 - K0 cabinet (height 850mm) with stand.
 - NC-320 Optimus splice cabinet (installed inside the K0 cabinet) equipped with mounting plates for microducts on both sides of the cabinet including a connection option for possible tracer wires.
- The outer parts of the K0 cabinet are galvanized and powder-painted steel plate.
 - Colour RAL 7008
- User-friendly design
 - The microducts are brought straight into the NC-320 Optimus splice cabinet. Thanks to this feature, there is no need to store a lot of cable excess into the K0 cabinet.
 - Mounting plates for microducts makes duct installation even more easy.
 - Total capacity
 - 26pcs Nestor Optimus DB 14/10mm
 - 52pcs Nestor Optimus DB 7/3,5mm
 - Microducts can be organized without using any tools.
 - The inlets of the NC-320 Optimus splice cabinet are wide and equipped with bristle sealings, so it is easy to bring microducts inside the cabinet.
 - NC-320 Optimus includes also guiding system for fibre tubes.
